CORE SUBJECTS

BEST CUSTOMERS

measures a **brand's ability to capture ideal customers** and avoid non-ideal customers. Definition of ideal customer based on dealer-centric behaviors of buying new, obtaining financing, and getting service/parts from the dealers

RANGE OF OFFERINGS

measures **diversity of a brand's vehicle line-up** by looking at the segments the brand plays in as well as the volume of the segment relative to the overall market

AGE OF OFFERINGS

measures the **"newness" of a brand's vehicle line-up** by looking at the specific models and vehicle life cycle in months

TRAFFIC

measures the **consumer interest in a brand** by looking at average new car shopping activity by model on KBB.com and Autotrader. Measures average annual traffic to a Make's vehicles

LOYALTY

measures **shopper loyalty on KBB.com** by observing people who price a trade-in from the brand and then go on to price a new vehicle from the same brand

ATTITUDINAL

measure of **consumers' perceptions of a brand** like reputation, affordability, and safety as measured by KBB Brand Watch

APPENDIX

CORE SUBJECTS

BEST CUSTOMERS – measures a brand’s ability to capture ideal customers and avoid non-ideal customers. Definition of ideal customer based on dealer-centric behaviors of buying new, obtaining financing, and getting service/parts from the dealers

RANGE OF OFFERINGS – measures diversity of a brand’s vehicle line-up by looking at the segments the brand plays in as well as the volume of the segment relative to the overall market

AGE OF OFFERINGS – measures the “newness” of a brand’s vehicle line-up by looking at the specific models and vehicle life cycle in months

TRAFFIC – measures the consumer interest in a brand by looking at average new car shopping activity by model on KBB.com and Autotrader. Measures average annual traffic to a Make’s vehicles

LOYALTY – measures shopper loyalty on KBB.com by observing people who price a trade-in from the brand and then go on to price a new vehicle from the same brand

ATTITUDINAL – measure of consumers’ perceptions of a brand like reputation, affordability, and safety as measured by KBB Brand Watch

All data are graded on a curve for non-luxury and luxury classes

BONUS OR PENALTY POINTS

After the basic GPA is calculated across all core subjects, adjustments are made for Attendance (Geography) and Citizenship (OEM)

GEOGRAPHY – we score each brand’s consistency in delivering share across markets. Brands can receive a bonus or penalty based on low or high variation in share across DMAs

OEM – measures the brand’s frequency of dealers citing the OEM and their mandates and restrictions as a factor holding back business as measured in the Cox Automotive Dealer Sentiment Index
